SUPPLEMENTATION

Supplements to this Code provide periodic updating through the removal and replacement of pages. This inter-leaf supplementation system requires that each page which is to be removed and replaced is identified so that the updating may be accurately accomplished and historically maintained.

Instructions for supplementation are provided for each supplement, identified by Supplement number, date and inclusive ordinance numbers. The Instructions for posting the removal and replacement of pages must be followed and accomplished in sequence, with the most recent supplementation posted **last**.

When supplementation is completed and the removal and replacement of all pages are accomplished, the Instructions should be placed under the Supplementation tab, behind this page, with the most recent Instruction sheet on top. Previous Instructions should not be removed, so that the user may refer to this tab section to verify whether the code book is fully updated with all supplements included.

The maintenance of a Municipal Code with all supplementation is an important activity which deserves close attention so that the value of the code is maintained as a fully comprehensive compilation of the legislative ordinances of the municipality.

PREFACE

The Town of Fraser, a statutory town, has published its Municipal Code in a format which features the following:

The *Table of Contents* is the table containing each chapter and article title, with reference to page location. Preceding each chapter is a chapter table of contents, also identifying each article by the subject name provided.

The *three-place section numbering system* places the chapter number first, followed by the article number and section number, separated by hyphens. Each section may be cited by the chapter, article and section number which are in sequence within each chapter.

The *open chapter and page numbering system* creates reserved chapter and page numbers for expansion or revision of the code without undue complication when changes are made to the code by supplementation.

The *Disposition of Ordinances Table* identifies the source for the contents of the code. This table provides ordinance numbers in chronological order and location by section number for the present code contents. Thus, if there is interest in determining whether an ordinance, or a portion thereof, is contained within the code, the Disposition of Ordinances Table will provide that information. The *Table of Up-to-Date Pages* lists all of the current pages through the most recent supplementation.

The *Index* provides references by common and legal terminology to the appropriate code sections. Cross references are provided with the Index when appropriate.

Supplements to the code provide regular updating of the code to maintain it as a current compilation of all the legislation which has general and continuing effect. Without regular supplementation, the code would soon lose its usefulness as a complete source of the general law of the municipality. Supplementation is accomplished by the periodic publication of additions and amendments to the code.

(c) Remedies. The remedies herein provided shall be cumulative and not exclusive and shall be in addition to any other remedies provided by law.

(16) Sec. 16-4-530. Application and review procedure. (Chapter 16, Article 4, B Business District)

Applications for uses permitted by special review shall be submitted and reviewed pursuant to the following process:

(1) Preapplication conference.

a. Prior to the formal submittal of any request for approval of a use permitted by special review in the B District, an informal preapplication conference shall be held between the applicant and Town staff. This conference will serve to acquaint the applicant with the requirements of the B District and to allow the Town staff to become familiar with the applicant's development intent and design philosophy.

b. A schematic site plan and building concept drawings will aid in discussion at this conference; however, the applicant is encouraged not to prepare detailed designs which might require extensive revision as a result of the preapplication conference. The applicant should bring the following information to the conference:

1. General project concept.
2. Specific uses proposed, including building size, location and parking.
3. Site plan concepts including landscaping, irrigation, grading, lighting and Signs.
4. An exterior materials package including roof material and color, wall material and color, etc.
5. Proposed construction time line.

(2) Review and decision.

a. Subsequent to the preapplication conference, an application with the required materials shall be filed with the Town. Only complete submittals will be accepted.

b. The application will be reviewed pursuant to the B District development permit process set forth in Division 2 of this Article with the exception that the application must be submitted thirty (30) days preceding the Planning Commission hearing. The application shall be considered a "major proposal" within the meaning of Sections 16-4-120 and 16-4-130 of this Article; provided, however, that the decision of the Planning Commission under Section 16-4-160 shall be in the form of a recommendation to approve, approve with conditions or deny the application.

c. Subsequent to receipt of the Planning Commission's recommendation, the Board of Trustees shall hold a public hearing on the application, notice of which

shall be given by publication in the same manner as required by Section 16-13-10 of this Chapter for amendments to the zoning ordinance, such published notice to be the responsibility of the Town. At least fourteen (14) days prior to the hearing date, notice of the hearing shall be sent to all owners of property within two hundred (200) feet of the property in question by certified mail, return receipt requested, such mailed notice to be the responsibility of the applicant. Within thirty (30) days of completion of the hearing, the Board of Trustees shall act to approve, approve with conditions or deny the application. The decision of the Board is final, subject to judicial review.

(3) Permits; duration and conditions; amendments; variances.

a. A use permitted by special review is valid so long as the conditions of approval are maintained by the applicant, unless a specific time limit for the use is set forth as part of the permit approval. If an approved use ceases operation for any reason for a period of one (1) year, the use permitted by special review shall be deemed expired, unless otherwise provided in the permit itself.

b. If the conditions of a use permitted by special review become the responsibility of a person or entity other than the applicant, the Town staff shall be notified in writing, identifying the new person or entity responsible for maintaining the conditions of the permit. Until such notice is received, the applicant shall remain responsible for maintaining the permit conditions. The notice shall be attached to the permit on file with the Town staff. However, it is the intention of this Subparagraph b. that the property owner remain responsible for compliance with permit conditions.

c. Failure to maintain the permit conditions shall be considered a violation of this Division and, in addition to the penalties provided for violations of this Code, shall subject the permit holder to revocation.

d. No approved use permitted by special review may be modified, structurally enlarged or expanded in ground area, unless such modification, enlargement or expansion receives the prior approval of the Town, which shall be obtained by submitting a new application for review under the procedures provided by this Division. Such application shall be submitted to and processed by the Town in the same manner as applications for the original permit itself; provided, however, that, at the preapplication conference, the applicant and Town staff shall agree upon the extent of submission requirements pertinent to the application. In the event that the applicant disagrees with the Town staff's decision with respect to the extent of the submission requirements, such disagreement may be preserved by the applicant as a part of its application for amendment, and the Planning Commission and Board of Trustees shall recommend and decide upon that appeal as a part of their decision on the amendment application itself.

e. The applicant may request a variance from or modification of the requirements applicable to the particular use by special review. Any such request shall be made as part of the application documents required for the application itself or after approval of such application. The request shall be considered by the Planning Commission as a part of its recommendation to the Board of Trustees. The

Board of Trustees, in its sole discretion, shall determine whether and to what extent such variance request shall be approved. The request for a variance must describe, and the Board of Trustees in granting such a variance must find, that all of the following conditions exist:

1. That satisfactory proof has been presented to show that the request is reasonably necessary for the convenience or welfare of the public;
2. That the variance would not authorize any use other than the use permitted by special review as described in the permit;
3. That unnecessary hardship to the applicant would be shown to occur if the variance were not granted; or that the application seeks a more cost-effective or technologically superior approach to some aspect of the use permitted by special review;
4. That the variance would not injure the value, use of or proper access to light and air of adjacent properties;
5. That the variance is the minimum variance necessary to accomplish the intended purposes; and
6. That the variance would not be out of harmony with the intent and purpose of this Division, this Chapter and all other ordinances and regulations of the Town.

The procedure for consideration of variances generally at Article 12 of this Chapter shall not apply to variances and amendments of uses permitted by special review.

(17) Sec. 16-4-570. Design guidelines. (Chapter 16, Article 4, B - Business District)

The following design guidelines must be satisfied in connection with the approval, construction and continued operation of mechanical wastewater treatment plants as a use permitted by special review under this Division:

- (1) Maximum height: Thirty (30) feet above treated sludge conveyor and loading areas; twenty (20) feet above all other plant components; measured pursuant to the definition of height of building set forth in Section 16-1-40 of this Chapter.
- (2) Color: A color palette for all proposed structures and features shall be submitted to and approved by the Planning Commission and Board of Trustees at the time of permit application. The color palette shall be designed to permit flexibility to the applicant in designing the facility, while at the same time rendering the facility as visually unobtrusive as possible. The same or similar building materials and colors shall be used on main structures and any accessory structures upon the site. Exterior wall colors should be compatible with the site and complementary to the materials used, the surrounding environment and the context of the neighborhood.
- (3) Exterior building materials: Exterior materials and architectural forms shall include two (2) or more materials in addition to roofing and structure materials. The principal materials used on building facades should be wood (including siding), stone, brick, stucco, pre-cast concrete with an architectural finish, split face block or other

material or facade acceptable to the Town. The facades of buildings must be broken up. Long, blank walls and roof lines must be avoided. All exterior wall materials must be continued down to finished grade, thereby eliminating unfinished foundation walls. The back of a building must have the same overall design as the front of a building. Exterior materials shall be approved by the Planning Commission and Board of Trustees.

(4) Prohibited external building materials: Metal.

(5) Roofs: Flat roofs are prohibited. All roofs must have a pitch of not less than two and one-half (2½) inches to twelve (12) inches.

(6) Noise and odor:

a. It is the intent of the Board of Trustees to regulate activities contributing or potentially contributing to the degradation of usage of property and of air quality within the Town limits in order to preserve public health, safety and welfare. Accordingly, no noise or odor shall emanate beyond the portion of the property used for wastewater treatment which interferes with the reasonable and comfortable use and enjoyment of property.

b. The applicant shall submit, as part of its application, a plan for controlling and containing noise and odor on the site, and for measuring compliance with that plan. The plan, if and when approved by the Board of Trustees, shall become a permit condition and a condition of permit approval.

c. Determination of a violation. A violation of either the noise or odor requirements of this Paragraph shall be determined only in the event that the Town has received complaints from a resident, a visitor or Town staff. The Town or its designated representative shall investigate the complaint and make a determination of whether the standards set forth herein have been violated. If a violation is found, the permit holder, at the Town's direction, shall forthwith take action to remedy or remove the condition causing the violation. The permit holder shall have fifteen (15) days, or such other period of time as may be determined by the Town, in which to cure the violation in a manner acceptable to the Town. Failure to so cure the violation may result in assessment, in the sole discretion of the Town, of reasonable civil fines and penalties, or the filing of a complaint in Municipal Court.

(7) Storage and removal of treated sludge: No treated sludge shall be stored on site except in the plant's primary structure. The removal of treated sludge shall occur at times mutually agreed upon by the applicant, the Planning Commission and the Board of Trustees.

(8) Wastewater treatment facility: All components of the wastewater treatment facility, with the exception of the treatment basins, shall be enclosed within a permanent structure. Treatment basins may be uncovered, covered by a permanent structure or beneath a suitable floating cover, the design and color of which shall be permitted as a part of the use permitted by special review permit.

(18) Sec. 17-1-110. Enforcement, violations and penalties. (Chapter 17, Article 1, General Provisions)

(a) It shall be the duty and responsibility of the Board of Trustees, or a designated representative, to interpret and enforce the provisions of these regulations.

(b) No owner, or agent of the owner, of any lot located in a proposed subdivision shall sell, agree to sell or negotiate to sell any lot, or portion thereof, before a final plat, as-built plat (if applicable) or subdivision exemption plat has been approved by the Planning Commission and Board of Trustees in accordance with the provisions of these regulations and recorded in the office of the County Clerk and Recorder.

(c) No permits shall be issued for the construction of any building or other improvements requiring a permit, nor shall any certificate of occupancy be granted, for any land for which a subdivision plat is required by these regulations, unless and until all requirements of these regulations have been complied with.

(d) It is unlawful to erect, construct, reconstruct, use or alter any building or structure or to use any land in violation of these regulations, and any person who violates this provision shall be subject to a fine and imprisonment as provided in Subsection (e) below.

(e) Any person who violates any of these regulations shall be punished as set forth in Section 1-4-10 of this Code.

(f) Appropriate actions and proceedings may be taken in law or in equity to prevent any violation of these regulations, to prevent unlawful construction, to recover damages, to restrain, correct or abate a violation and to prevent illegal occupancy of a building structure or premises. These remedies shall be in addition to the penalties described in Subsection (e) above.

(19) Sec. 18-1-40. Penalties and enforcement. (Chapter 18, Article 1, Building Codes)

(a) It shall be unlawful for any person, as defined in said codes, to erect, construct, enlarge, alter, repair, move, improve, remove, connect, demolish, equip, use, occupy or maintain any building or structure in the Town in violation of or contrary to any of the provisions of this Article or said codes adopted herein. Each and every day during which such illegal erection, construction, reconstruction, alteration, maintenance or use continues shall be deemed a separate offense.

(b) Every person convicted of a violation of any provision of this Article or the codes adopted herein shall be punished as set forth in Section 1-4-10 of this Code.
